

## NorseBoat 21.5 – Classic Lines, Modern Craft

21.5 Cabin & Open Models, Engineered For High Performance & Ease of Use

The NorseBoat 21.5 Cabin and Open models have classic lines and exceptional performance. At the dock they attract a crowd. Under sail their efficient hull shape and rig make them stable, well balanced and responsive.

NorseBoats are built to exacting standards, and come in three sizes: NorseBoat 12.5, NorseBoat 17.5 and NorseBoat 21.5. The hulls are provided by Bras d'Or Boatworks of Baddeck, Nova Scotia, and the balance of the build and outfitting are by NorseBoat Limited on Prince Edward Island.

NorseBoat styling and sailing performance are superb. The 21.5 models have recognizable NorseBoat features such as the lapstrake hull, abundant cockpit seating and storage space, pivoting carbon mast, fully-battened mainsail with signature curved head, and furling genoa mounted on a bowsprit. The lapstrake hull transitions to smooth below waterline, and the sleek lines and powerful sail plan give the 21.5 models a competitive edge.

Another trademark of the NorseBoat 21.5 is the ease of use. It can be single-handed, is eminently trailerable, and can be rigged by one or two people in about 15 minutes. It goes in and out of the water effortlessly, and can be towed by a modest-size vehicle.

The 21.5 Cabin and Open models have the same innovative fiberglass hull. The balance of the build for both models is a high-quality wood/epoxy/glass composite. The Open model has a varnished wood coaming, similar to the NorseBoat 12.5 and 17.5 models.

The NorseBoat 21.5 is relatively lightweight, with a sailing displacement-to-length ratio of 150. A ballasted foil-shaped stub keel, modest-size pivoting centerboard and kick-up rudder provide good stability with shallow draft. The spacious cockpit seats eight and has large storage lockers for gear.

There are a wide range of options available for the NorseBoat 21.5.

### **NorseBoat 21.5 Specs**

LOA (on deck)	21'-10", 6.35m
LWL	19'-7", 5.97m
Beam	7'-1", 2.16m
