

## NorseBoat 21.5 - Classic Lines, Modern Craft

The NorseBoat 21.5 Cabin and Open models have classic lines and exceptional performance. On land or sea they attract a crowd. Under sail their efficient hull shape and rig make them stable, well balanced and responsive.

NorseBoats are built to exacting standards, and come in three sizes. The NorseBoat 17.5 Classic is our most popular model due its versatility and price point. Our NorseBoat 12.5 is a smaller, sassy sistership. And the NorseBoat 21.5 is the largest boat in our fleet, available as a partially decked Open model or as a Cabin model.

NorseBoat styling and sailing performance are superb. The 21.5 models have recognizable NorseBoat features such as the lapstrake hull, abundant cockpit seating and storage space, pivoting carbon mast, fully-battened mainsail with signature curved head, and furling genoa mounted on a bowsprit. The lapstrake hull transitions to smooth below waterline for great performance, and the sleek lines and powerful sail plan give the 21.5 models a competitive edge.

Another trademark of the NorseBoat 21.5 is the ease of use. It can be single-handed, is eminently trailerable, and can be rigged by one or two people in about 15 minutes. It goes in and out of the water effortlessly, and can be towed by a modest-size vehicle.

The 21.5 Cabin and Open models have the

same innovative fibreglass hull. The balance of the build for both models is a high-quality wood/epoxy/glass composite. Both models have comfortable seating with a painted cockpit coaming and wood trim cap, similar to the NorseBoat 17.5.

The NorseBoat 21.5 is relatively lightweight, with a sailing displacement-to-length ratio of 150. A ballasted foil-shaped stub keel, modest-size pivoting centerboard and inboard rudder provide good stability with shallow draft. The spacious cockpit seats four adults in the Cabin model and 6 adults in the Open model, and both have large lockers for gear.

There are a wide range of options available for the NorseBoat 21.5.

### **NorseBoat 21.5 Specs**

LOA (on deck)	21'-10", 6.35m
LWL	19'-7", 5.97m
Beam	7'-1", 2.16m
